These documents may also be adapted to National Competitive Bidding (NCB) with some changes generally necessary in the Instructions to Bidders and the Conditions of Contract.

Care should be taken to check the relevance of the provisions of the standard documents against the requirements of the specific Services to be procured. The following directions should be observed when using the documents:

- (a) All the documents listed in the Table of Contents are normally required for the procurement of Services; however, they should be adapted as necessary to the circumstances of the particular Project.*
- (b) Details to be provided by the Employer prior to release of the bidding documents are limited to the Invitation for Bids (User's Guide), Instructions to Bidders (Section 1), Bidding Data Sheet (Section 2), and Special Conditions of Contract (Section 7), in addition to Sections 5 and 8, which deal with Activity Schedule, Performance Specifications and Drawings, respectively. **Specific details** should be furnished in the spaces indicated by italicized notes inside brackets. Those details not filled in by the Employer are the responsibility of the Bidder.*
- (c) These Sample Bidding Documents are intended to serve on a repetitive basis in the Islamic Republic of Afghanistan. Modifications to address specific Project or Contract needs should be provided only in the Special Conditions of Contract as amendments to the Conditions of Contract. If modifications must be made to the bidding procedures, they can be presented in the Bidding Data Sheet.*
- (d) The foot-notes and the italic texts between brackets are not part of the text, but rather contain instructions for the user, as does and this Introduction. **They should not be incorporated in the bidding documents.** The cover should be modified as required to identify the bidding documents as to the names of the Project, Contract, and Employer, in addition to the date of issue.*
- (e) The standard documents have been prepared for bidding where post-qualification applies; adaptations are necessary to ITB Clause 4 and corresponding Bidding Data Sheet, and Forms when prequalification has taken place. The process of prequalification of bidders is not covered in these standard documents.]*

SECTION 5 ACTIVITY SCHEDULE

Terms of Reference (TOR) – 60 MHz Satellite Bandwidth for Afsat-1 TDF VSAT Sites and Migration of 150 Remote Sites Project

1. Background

Afghan Telecom Company is a national telecommunication company that provides telecommunication services in all villages and remote areas of Afghanistan. Since Afghanistan is a mountainous country, due to its geographical specifications, it is not possible to provide telecommunication services through optical fiber and microwave in its remote and mountainous areas. Afghan Telecom Company could offer telecommunication services in these remote areas through satellite. As of now, more than 300 sites of Salaam Cellular Network are working in different villages and isolated regions all over Afghanistan in the content of the Telecommunication Development Fund (TDF), which are connected through VSAT.

2. Introduction

Afghan Telecom Company provides telecommunication services in remote and mountainous areas of Afghanistan through satellite in the content of the Telecommunication Development Fund (TDF). As of now, more than 300 sites of Salaam cellular network are connected through satellite. Almost 150 of these sites are connected through the Afsat-1 satellite. Since the lifetime of the Afsat-1 satellite will be finished by the end of January 2021, we need 60 MHz satellite bandwidth from a new satellite for connecting our 150 TDF VSAT sites.

3. Project Objectives

- To provide telecommunication services in the rural and very remote areas of Afghanistan.
- To provide satellite bandwidth for almost 150 TDF VSAT sites.
- To prevent the outage of 150 TDF VSAT sites after the end of the lifetime of Afsat-1 satellite.
- To prevent the outage of Salaam services in the remote areas of Afghanistan.
- To perform the migration of 150 TDF VSAT sites from Afsat-1 satellite to a new satellite with the same range of frequency.

4. Technical Specifications of the Project

Afghan Telecom seeks a qualified company to provide the following services:

- Provide 60 MHz satellite bandwidth in the range of Extended Ku-Band that should be compatible with our HUB and Remote site equipment. The full specifications of our HUB and remote sites will be provided later in this document.

National Procurement Authority – Standard Bidding Documents for Procurement of Non consultant services

- Activation of the 60 MHz satellite bandwidth in the VSAT HUB.
- Migration of 150 VSAT sites from Afsat-1 satellite to the new satellite. The complete details of VSAT remote sites and the migration process will be provided later in this document.

The satellite which the contractor will provide us the required bandwidth from should have the following specifications:

- The satellite should have an excellent footprint in Afghanistan.
- The satellite should have at least seven years of remaining lifetime.
- The range of frequency of the satellite should be compatible with our HUB and remote equipment so that we could activate and use the bandwidth without bringing any changes in the equipment of HUB and remote sites.
- The total 60 MHz bandwidth should be from one transponder and should be in a continuous range of frequency.

4.1. HUB Equipment Specifications

We are using the iDirect platform for our TDF VSAT network. The specifications of our HUB equipment are as below:

No	Item Name	Description	Comments

Note: Since the migration of the sites is planned to be started at the beginning of November 2020, up to that time, we might activate some more sites in this satellite. That is why we put seven new possible sites on the list for migration.

All the VSAT remote sites listed above should be re-pointed from the Afsat-1 satellite to the new satellite. The contractor should physically send their field technician to swap the sites to the new satellite. The swapping of a site includes the following processes:

- Load the new option file to the satellite modem.
- Re-point dish antenna from Afsat-1 Satellite to the new satellite.
- Increase the received signal strength to the desired level.
- Perform the cross-pole isolation (CPI) and 1dB compression tests with the satellite provider.
